**Addendum to the Application of
Janice Claudio Revocable Trust
624 First Street, Greenport**

The applicant is requesting 3 variances to allow for a small expansion of the existing structure as well as the construction of a new garage. The first request is a side yard variance from the north property line from the existing 7.4 feet to 3.5 feet to allow for a one story addition. Applicant is also requesting a lot coverage variance from the required 30% to 35.5% to allow for 3 modest additions to the first floor of the building and the construction of an accessory garage. The proposed garage requires relief from the side and rear yard set backs from 5 feet to 3 feet. The expansion of the house will allow for the construction of a master bedroom on the first floor as well as an expansion to provide additional living space on the first floor where Ms. Claudio intends to reside as she ages. The house is historic and does not have storage capacity in the basement or the attic so the applicant is requesting an enlarged garage to accommodate storage needs.

1. Whether an undesirable change will be produced in the character of the neighborhood or a detriment to nearby properties will be created by the granting of the area variance.

A grant of the requested variance will not have a negative impact on the neighborhood. This neighborhood is characterized by large two story houses. If the variances are granted, the improvements on the property will be consistent with the surrounding neighborhood. In fact, 17 of the 18 homes on First Street between North and Broad Streets are two stories.

2. Whether the benefit sought by the applicant can be achieved by some method feasible for the applicant to pursue, other than an area variance.

The benefit sought by the applicant can only be achieved through an area variance. Ms. Claudio would like to construct a first floor master bedroom so that she can gracefully retire in the house. Also, the house does not have a basement or attic that can be used for storage. Therefore, Ms. Claudio needs the variances necessary to construct an expanded garage that will accommodate the storage needs.

3. Whether the requested area variance is substantial.

The requested variances are not substantial. The side yard variance is for a 60 square foot one story addition; no part of which would be located any closer to the lot line than the existing house. The lot coverage variance is only 3.9% and the requested set back relief is from 5 feet to 3 feet or 40%. Based upon the placement of the structures, the variances will not negatively impact any direct neighbor and therefore the variances are not substantial.

4. Whether the requested variance will have an adverse effect or impact on the physical or environmental conditions in the neighborhood or district.

The requested variances will not have a negative impact on the environment. Area variances are designated as Type II actions under the New York State Quality Review

RECEIVED
JUL 08 2020
BY:

Act ("SEQRA"). The NY State DEC has categorically determined that area variances will not have a negative impact on the environment.

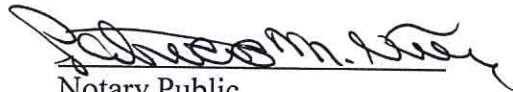

5. **Whether the alleged difficulty was self-created, which consideration shall be relevant to the decision of the Zoning Board of Appeals, but not necessarily preclude the granting of the area variance.**

The variances requested would be self created but they should not preclude the granting of these area variances.
