

123 Sterling Affordable Units Update

Please be advised the developer/owner of the condominium complex has informed the village all five units are in contract. The village housing authority had a very minimal role in only reviewing the qualifications of the five selected in the developer managed application process and lottery per a prior legal stipulation.

However, please know the village insisted the developer make these units for sale after sitting vacant and unlisted for well over a year. As many have asked we felt the need to share the information as applicants say they haven't heard back from the developer.

We're very much looking forward to seeing them occupied in the next month; and, are focused on finding more ways to solve for housing challenges including code changes which will allow for more housing in the commercial district and more.
