Independent Accountant's Compilation Report

Mayor and Board of Trustees Incorporated Village of Greenport, New York - Electric Department Greenport, New York

Management is responsible for the New York Power Authority Annual Report of the Incorporated Village of Greenport, New York — Electric Department (Annual Report) as of and for the year ended May 31, 2022, with certain 2021 information included in the accompanying prescribed form in accordance with the requirements of the New York Power Authority. We have performed a compilation engagement in accordance with Statements on Standards for Accounting and Review Services promulgated by the Accounting and Review Services Committee of the AICPA. We did not audit or review the Annual Report included in the accompanying prescribed form, nor were we required to perform any procedures to verify the accuracy or completeness of the information provided by management. Accordingly, we do not express an opinion, a conclusion, nor provide any form of assurance on the Annual Report included in the accompanying prescribed form.

The Annual Report included in the accompanying prescribed form is presented in accordance with the requirements of the New York Power Authority and is not intended to be a presentation in accordance with accounting principles generally accepted in the United States of America.

This report is intended solely for the information and use of the Mayor, Board of Trustees and the New York Power Authority and is not intended to be and should not be used by anyone other than these specified parties.

BST+Co.CPAs, LLP

Albany, New York August 25, 2022

101 Exact name of the respondent municipality: Incorporated Village of Greenport Year Ended: 5/31/2022 102. The name, title and office address of the person to whom should be addressed any Robert Brandt, Village Treasurer 236 Third Street, Greenport, New York 11944 correspondence concerning this report. 103. Under what law or laws is the respondent engaged in: (a) street lighting: General Village (b) commercial lighting: General Village 104. By what board or officers is the lighting plant directly controlled? How many Village Board members has such board? Mayor and Four Trustees 105. Give date of respondent's beginning (a) street lighting: May 1899 (b) commercial lighting: May 1899 106. Give the requested information concerning officers or commissioners in charge of the lighting plant and operations at any time during the year, including members of special boards or the general governing body of the municipality if there is no special board or commission in charge of electric operations. Term of Office Compensation during year Name of Officer± S Title Beginning Expiration Total Portion charged to Line electric department (a) (b) (c) (d) \$ (e) (f) George Hubbard, Jr Mayor 4/19 4/23 30,000 9,000 Jack Martilotta 4/19 Trustee 4/23 11,600 3,480 3 Julia Robins Trustee 4/21 4/25 11,600 3,480 Mary Bess Phillips Trustee 4/21 4/25 11,600 3,480 Peter Clarke Trustee 4/19 4/23 11,600 3,480 10 107. Give the requested information concerning the employees connected with the lighting department at any time during the year. Entries on lines 21 to 29 should show each person who received a yearly or monthly salary and each person who performed important supervisory duties regardless of the basis of compensation and whether or not employed for the entire year. All other employees should be grouped according to nature of duties and entries on lines 30 to 37 in column (a) should reflect the type of such employees and the number of each type Compensation during year Title of Position Š. NOTES TO BALANCE SHEET

- 1. In the space immediately below and in the corresponding space on facing page 3, provide any important notes regarding the balance sheet or any account thereof.
- Show above the comparative balance sheet of the minicipal electric utility classified in accordance with the system of accounts used by the respondent.
- 3. Each item should be consistent with corresponding details shown elsewhere in this report.
- 4. In a footnote describe all contingent assets and contingent liabilities of the utility plant at the end of the year. *If none, state that fact.*

Account 145 represents Deferred Outflows in connection with the GASB 68 - Net Pension Liability. Account 110 - Construction in Progress represents engineering and related costs associated with the Electric Department's microgrid project.

No Contingent Assets at May 31, 2022.

*	Increases	in	black,	decreases	in	red.
---	-----------	----	--------	-----------	----	------

‡ Item column (g) includes (show amount here) \$80,000 long-term debt maturing within one year or less from the date of the balance sheet.

† If debit balances exisited in this account, enter them and the balances in account 281, in column (e) and extend in columns (f) and (g) on line 29 the net amounts.

Net debit amounts should be entered in red ink.

110. CONTRIBUTIONS-OPERATING MUNICIPALITY

- Give hereunder an analysis of transactions during the year affecting account 280, Contributions-Operating Municipality, showing debit items in columns (a) and (b) and credit items in columns (c) and (d).
- 2. State first, the balance (either debit or credit) at the beginning of the year and follow this with a summary of the transactions during the year from which should be developed the balance at the end of the year to be entered on the smaller side, thereby developing equal totals for columns (b) and (d).
- 3. If the following transactions occurred during the year, they should be separately stated as debits or credits, as the case may be, and other transactions clearly described:
- (a) Cash transfers
- (b) Property and equipment transfers
- (c) Materials and supplies
- (d) Payroll items (salaries and labor)
- (e) Use of real property for which no payment or only nominal payment was made*
- (f) Use of equipment or facilities for which no payment or only nominal payment was made*
- (g) Insurance
- (h) Electricity
- (i) Water
- (j) Payments to State Employees' Retirement Systems

116. ANALYSIS OF CHARGES TO OTHER DEPARTMENTS OF OPERATING MUNICIPALITY

- 1. Show hereunder all items which during the year were charged by the electric department to other departments of the operating municipality.
- Items should be classified according to their nature and should be shown in the following order and letter to correspond to the subdivisions indicated.
 - (a) Contributions of cash, material and supplies, equipment, or real property, subdivided according to the nature of the items.
 - (b) Salaries of executives, subdivided by title of positions.
 - (c) Wages, subdivided by classes of labor
 - (d) Other personal service, subdivided by classes of service.
 - (e) Public Street Lighting
 - (f) Other electric service.
 - (g) Steam
 - (h) Space rentals, subdivided by location and type of structures or land.
 - (i) Building service, subdivided by location and type of buildings.
 - (j) Use of facilities or equipment, subdivided by classes of equipment.
 - (k) Insurance, subdivided by types of protection.

- (1) Pensions, subdivided by classes of employees.
- (m) Other items, classified according to type and purpose.
- 3. In column (d) show for each item the basis upon which was determined the amount charged to other departments of the municipality and in columns (e) and (f) the amount so charged, subdivided between amounts representing contributions and includible in account 280. In columns (g) to (j) show for each charge the distribution of credits therefor to accounts of the electric department.
- 4. Payroll charges which are distributed to other departments of the municipality on the basis of the time actually devoted to such departments and at the rate actually paid to the employee should be so described and listed separately from payroll items which are distributed on an allocated basis or at a rate other than that actually paid.
- In each subdivision, items of like nature which for the year did not exceed five dollars may be grouped and shown in total, provided that for each group the number of such items is stated.

45.	Total Operating Rev Electric			4,054,593	39,577	4,094,170	xxx

Note: Misc. Revenues (Account 622) include \$142,553 of CES charges, that are billed to the customer as a separate line item on monthly billing.

Misc. Revenues (Account 622) also includes a \$175,000 settlement for costs incurred in prior years; Insurance recoveries for flood damage; and and a write-off of a retainage payable recorded in a prior year.

- ‡ Excluding current used in station auxiliaries. Step-up transformers are not to be considered station auxiliaries.
- * To nearest hundredth of a cent, e.g., 5.43.

Strike out basis which does not apply.

120. LOCATION AND CAPACITY OF ELECTRIC SUBSTATIONS

 Show for each of the several substations owned or leased by the respondent at the end of the year, the location (including street and No.), the No. or other designation of the station on the respondent's books and other records.

2. Distinguish between transmission and distribution substations.

		Electric Substations								
	Location of station	Name of	No. & Size	Capacity in	High Voltage	Low Voltage

121. LINE TRANSFORMERS

- Show the requested information concerning line transformers in the possession of the respondend, including thoses in stock as well as those installed.
- If any such transformers were held by respondent under any title other than full ownership, give the particulars concerning respondent's title in a footnote.
- Use the upper section of the schedule for showing those items which are in general used and the lower section for those items which are used in a municipal street lighting and/or signal system service exclusively.

A - General.

124. SALES BY MUNICIPALITIES---ELECTRIC

- Show the requested information concerning each city, village, or town in which respondent rendered service at any time during the year, and state separately for each operating revenue account the number of consumers at the end of the year and the sales in kw.h. and the revenues therefrom during the year.
- 2. The kw.h. shown in this schedule shall be measured by consumers' meters, or in the case of sales not metered, estimated at the point of delivery to the consumer, or in the case of street lighting for which the utility furnishes the conductors, at the lamp.

3. State the program of meter reading and billing in effect during the year and the date of any change within the year in that program. Give for each class of consumers the dates within each month when meters are generally read, the date when billing usually is completed, and the last month and the latest day of that month for which sales are reported above.

Meters are read every thirty to thirty-five days and a bill is generated and sent out within two weeks. The revenues reported on this report are through May 31, 2022.

^{*} At end of year. In this column, show for account 604 the operating municipality as an individual consumer, and for account 606 include each active service connection.

125. SALES BY SERVICE CLASSIFICATIONS -- ELECTRIC

- Show hereunder by months the number of bills rendered and the sales
 of electric energy under each schedule and service classification.
 When the same rate is contained in more than one schedule, all sales
 and revenues under that rate may be combined, but each schedule and
 each service classification No. must be shown in the controlling
 heading above the columns in which sales are listed.
- 2. Contract sales within each month to others than public authorities for public use, not charged under a filed tariff, may be combined under a general heading "Contract sales"; all current delivered to the operating municipality should be combined under "Sales to the operating municipality"; sales to the other municipalities for street lighting purposes or under special arrangements should be grouped under "Sales to other municipalities". Amounts of revenue should be reported on the same basis as entries in column (f) of schedule 119 and amounts receivable on other than a monthly basis may be allocated in equal amounts to the months to which applicable.
- 3. Below line 13 show the manner in which the sales under the service classifications of contracts were distributed to the revenue accounts, and the number of bills applicable to each account.

- 4. The kw.h. shown on this schedule shall be measured by consumers' meters, or in the case of sales not metered, estimated at the point of delivery to the consumer, or in the case of street lighting for which the utility furnishes the conductors, at the lamp.
- 5. Show hereunder by months the following information with respect to the Purchased Power Adjustment Clause (PPAC) a) PPAC factor per kwh as shown on monthly statements; b) total kwh to which the PPAC factor was applied; c) revenues generated from the application of the PPAC; and d) differential in present and base costs by month entered in Totals For Year schedule only, i.e., the difference between actual purchased power billings and the base purchased power cost(s).
- 6. In footnotes provide the following: a) Base Purchased Power Cost(s) and the period for which effective; b) the factor of adjustment for distribution system efficiency and c) date(s) consumer meters are read, indicating if on a monthly or bi-monthly billing period.

Notes to New York Power Authority Financial Report May 31, 2022

Note 1 - Organization and Summary of Significant Accounting Policies

The Incorporated Village of Greenport - Electric Department (Department) is engaged in the distribution of retail electric power in the Village of Greenport, New York (Village). The Department owns and operates distribution facilities and supplies electricity to approximately 2,170 customers. The Department is managed as an enterprise fund of the Village and is subject to regulation by the New York Power Authority (NYPA) with respect to wholesale power purchased, rate structure, accounting, and other matters.

The Village and Department are governed by Village law and other general laws of the state of New York. The Board of Trustees is the legislative body responsible for overall operations, the Mayor serves as Chief Executive Officer, and the Treasurer serves as Chief Fiscal Officer.

a. Basis of Accounting and Financial Report Presentation

The Department's financial report is prepared in accordance with the requirements of NYPA and is not intended to be a presentation in accordance with accounting principles generally accepted in the United States of America. The financial report is presented in a form prescribed by the Federal Energy Regulatory Commission (FERC) and NYPA, as required by NYPA.

All activities of the Department are accounted for within a single proprietary (enterprise) fund. Proprietary funds are used to account for operations that are: (a) financed and operated in a manner similar to private business enterprises where the intent of the governing body is that the cost (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges; or (b) where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability, or other purposes.

The Department's financial report is prepared on the accrual basis, whereby revenues are recognized when earned, and expenses are recorded when incurred. Fixed assets and long-term liabilities related to these activities are recorded within the fund. NYPA regulations require that the accounting records be maintained in accordance with the *Uniform System of Accounts for Municipal Electric Utilities*.

b. Estimates

The preparation of financial reports requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, revenues and expenses, and the disclosure of contingent assets and liabilities at the date of the financial statements and the period then ended. Actual results could differ from those estimates.

c. Revenue Recognition

Revenues are recorded on the cycle-billing basis by which revenue is recognized when customer meters are read, and bills issued.

Notes to New York Power Authority Financial Report May 31, 2022

Note 1 - Organization and Summary of Significant Accounting Policies - Continued

c. Revenue Recognition - Continued

Operating revenues are determined based on customer usage and demand charged at base rates for each consumer class approved by NYPA. Purchased power costs incurred in excess of those costs included in the base rate calculation are passed on to the consumer at no profit or loss to the Department by means of a monthly "Purchased Power Adjustment" (PPA) factor.

d. Cash and Cash Equivalents

Cash and cash equivalents consist of cash and investments that mature no more than three months after the date purchased.

Reserved cash and cash equivalents are reserved for use and purposes by the Board or NYPA.

Reserved cash and cash equivalents are held by the Department for the following purposes:

- <u>Depreciation Reserve Fund</u> Transfers to this fund may be made up to, but not in excess of, the prior year's depreciation expense and are used for replacements of the utility plant. The balance in the Depreciation Fund was \$1,999,368 at May 31, 2022 and will be used for the future replacement of operating property.
- <u>Customer Deposits Fund</u> The Department requires deposits from certain customers prior to providing service. Unused deposits are returned to customers when service is terminated. The balance of the Customer Deposits Fund was \$124,691 at May 31, 2022.
- Reserve for Future TCCs The Department has set up a cash reserve for the payment of
 future transmission congestion charges (TCC). This reserve will be funded with charges
 assessed customers, via the PPA factor, in advance of the required due dates of the TCC
 payments.
 - As of May 31, 2022, the Department has billed its customers for the TCC payments due in June 2021 and October 2021. Cash held in reserve for these payments totaled \$402,542 at May 31, 2022.
- <u>Debt Service Reserve</u> To demonstrate fiscal responsibility, the Department has set up a cash reserve for the payment of principal and interest to be made in the subsequent fiscal year on its outstanding bond indebtedness. This reserve totals \$172,244 at May 31, 2022 and is equal to the principal and interest to be paid during fiscal year 2023.
- <u>Energy Efficiency Reserve</u> During the fiscal year ended May 31, 2020, the Department created an Energy Efficiency Program for the purpose of supporting programs and projects which will promote energy conservation and reduce electrical energy consumption. Contributions made to this reserve are funded from the Department's operating reserves. This reserve totals \$143,028 at May 31, 2022.

Operating cash and cash equivalents held by the Department are as follows:

At the recommendation of NYPA, it is the Department's intentions to maintain operating cash balances equal to three months of operating expenses. Operating cash balances at May 31, 2022 totaled \$794,594 which currently represents approximately three months of operating expenses, based on fiscal year 2022 operating expenses, excluding depreciation expense.

Notes to New York Power Authority Financial Report May 31, 2022

Note 1 - Organization and Summary of Significant Accounting Policies - Continued

d. Cash and Cash Equivalents - Continued

The Department is required to collateralize its cash deposits in excess of the Federal Deposit Insurance Corporation limit. This collateral is in the form of government and government agencies' securities pledged by financial institutions, under third-party trust agreements. As of May 31, 2022, the collateral was sufficient to secure the Department's deposits.

e. Accounts Receivable

Accounts receivable are carried at original invoice amount less an estimate made for doubtful receivables based on a review of all outstanding amounts on a periodic basis. Management determines the allowance for doubtful accounts by identifying troubled accounts and by using historical experience applied to an aging of accounts. The Department's allowance for doubtful accounts at May 31, 2022 was \$159,000.

Accounts receivable are written off when deemed uncollectible. Recoveries of accounts receivable previously written off are recorded when received. An account receivable is considered to be past due if any portion of the receivable balance is outstanding for more than 20 days. Interest is charged on accounts receivable that are outstanding for more than 20 days at 1.50% per month and is recognized as it is charged. Recoveries of accounts previously written off, net of accounts deemed uncollectible, totaled \$20,633 for the year ended May 31, 2022.

f. Inventory

Inventory is valued using an average cost method. Inventory materials recovered and returned to stock in construction, maintenance, or the retirement of operating property are valued at current replacement prices. Inventory consists of components, parts, and tools held for consumption.

g. Operating Property

Under the provisions of the *Uniform System of Accounts for Municipal Electric Utilities*, operating property is recorded at cost, including capitalized labor and overhead. Overhead costs include fringe benefits, warehouse, and truck costs. Operating property constructed with capital fees received from customers or other parties is included in utility plant. Capital fees, which are presented as contributions for extensions in this financial report, total \$2,190,030 at May 31, 2022, and were related to a federal grant received in connection with the Department's rebuild and renovation of its existing distribution system and other operating property.

When operating property is retired, the book cost, together with the cost of removal, is charged to accumulated depreciation. The provision for depreciation has been computed, based on asset groups, under the straight-line method utilizing rates approved by the Electric Fund. These rates range from 2% to 10.5% per annum and are within the ranges recommended by FERC and NYPA.

The costs of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized. Improvements are capitalized and depreciated over the remaining useful lives of the operating property, as applicable.

The Department periodically reviews long-lived assets for impairment to determine whether any events or circumstances indicate the carrying value of the assets may not be recoverable. No impairment was identified during the year ended May 31, 2022.

Notes to New York Power Authority Financial Report May 31, 2022

Note 1 - Organization and Summary of Significant Accounting Policies - Continued

h. Compensated Absences

Vacation eligibility and accumulation is specified in collective bargaining agreements and in individual employment contracts. Some earned benefits may be forfeited if not taken within varying time periods.

Sick leave eligibility and accumulation is specified in collective bargaining agreements and in individual employment contracts. Upon retirement, resignation, or death, employees may be eligible to receive the value of unused accumulated sick leave.

The Department's liability for compensated absences at May 31, 2022 was \$75,187 and is included in miscellaneous current liabilities in this financial report.

i. Postemployment Benefits

The Department provides health insurance coverage and survivor benefits for retired employees and their dependents. Collective bargaining agreements determine if Department employees are eligible for these benefits if they reach normal retirement age while working for the Department. The Department reports its postemployment benefits in accordance with Governmental Accounting Standards Board Statement No. 45 (GASB No. 45), in which these benefits are determined on an accrual basis, where the expected value of the benefit is actuarially calculated and recognized as a cost over the working lifetime of employees.

The Department's liability for postemployment benefits at May 31, 2022 was \$3,295,276 and is included in miscellaneous long-term debt in this financial report.

Pensions and Deferred Outflows and Deferred Inflows of Resources

The Department is a participating employer in the New York State and Local Retirement System (System). Employees in permanent positions are required to enroll in the System, and employees in part-time or seasonal positions have the option of enrolling in the System. The System is a cost sharing, multiple-employer, public employee defined benefit retirement system. The impact on the Department's financial position and results of operations due to its participation in the System is more fully disclosed in Note 4.

During June 2015, the Department adopted GASB Statement No. 68, Accounting and Financial Reporting for Pensions. The primary objective of this statement is to improve accounting and financial reporting by state and local governments for pensions. It also improves information provided by state and local governmental employers about financial support for pensions that is provided by other entities.

In accordance with GASB Statement No. 68, the Department reports its proportionate share of the net pension liability, along with related deferred outflows of resources and deferred inflows of resources on its balance sheet. Pension related deferred outflows of resources and deferred inflows of resources may occur due to differences between expected and actual experience, changes in actuarial assumptions, the net difference between projected and actual investment earnings on pension plan investments, changes in proportion and difference between employer contributions, and proportionate share of contributions and employer contributions made after the measurement date.

Notes to New York Power Authority Financial Report May 31, 2022

Note 1 - Organization and Summary of Significant Accounting Policies - Continued

j. Pensions and Deferred Outflows and Deferred Inflows of Resources - Continued

Deferred outflows of resources resulting from differences between expected and actual experience and projected and actual investment earnings are \$522,541 at May 31, 2022. Deferred inflows of resources resulting from changes in the Department's proportion and differences between employer contributions and proportionate share of contributions are \$728,050 at May 31, 2022.

k. Short-Term Interfund Receivables/Payables

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as "receivables from operating municipality" or "payables to operating municipality" on the balance sheet.

I. Contributions

The Department recognizes contributions to the Village as a reduction of surplus in its contribution to municipality account. Contributions to the Village for the year ended May 31, 2022 totaled \$88,000.

m. Subsequent Events

The Department has evaluated subsequent events for potential recognition or disclosure through August 25, 2022, the date the financial statements were available to be issued.

Note 2 - Operating Property

A summary of the Department's operating property, at cost, including additions made during the year ended May 31, 2022, is presented in Schedule 102 on Page 5 of the financial report. Depreciation expense for plant in service was \$312,457 for the year ended May 31, 2022.

Note 3 - Bonds Payable

A summary of the Department's bond issues at May 31, 2021, is as follows:

Description	Issue Date	Maturity Date	Interest Rate	Balance
2014 Public Improvement Serial Bond	1/2014	10/2041	2.25% to 4.25%	\$ 2,355,000

Interest expense incurred and paid on the above indebtedness was \$93,911 and \$94,244, respectively, for the year ended May 31, 2022. Interest accrued, but not due, on this indebtedness was \$15,541 at May 31, 2022.

Notes to New York Power Authority Financial Report May 31, 2022

Note 4 - Retirement System

a. Plan Description

The Department participates in the New York State and Local Employees' Retirement System (ERS). ERS provides retirement benefits as well as death and disability benefits. Obligations of employers and employees to contribute and benefits to employees are governed by the New York State Retirement and Social Security Law (NYSRSSL). As set forth in the NYSRSSL, the Comptroller of the State of New York (Comptroller) serves as sole trustee and administrative head of ERS. The Comptroller shall adopt and may amend rules and regulations for the administration and transaction of the business of the ERS and for the custody and control of its funds. ERS issues a publicly available financial report that includes financial statements and required supplementary information. That report may be obtained by writing to the New York State and Local Employees' Retirement Systems, 110 State Street, Albany, New York 12244.

b. Funding Policy

The ERS is noncontributory, except for employees who joined the New York State and Local Employees' Retirement System after July 17, 1976, who contribute 3% of their salary for the first ten years of service and employees who joined on or after January 1, 2010, who generally contribute 3% of their salary for the entire length of service. Under the authority of the NYSRSSL, the Comptroller annually certifies the actuarially determined rates expressly used in computing the employers' contributions based on salaries paid during the System's fiscal year ending March 31.

Retirement expense for the year ended May 31, 2022 was \$76,449. Accrued contributions not yet paid to the System as of May 31, 2022 was \$12,574 and is included in accounts payable in this financial report.

Contributions made to the System were equal to 100% of the contributions required for each year.

c. Pension Liabilities, Pension Expense, Deferred Outflows of Resources, and Deferred Inflows of Resources Related to Pensions

At May 31, 2022, the Department reported a liability of \$2,450, for its proportionate share of the Village's net pension liability, which is included in miscellaneous long-term debt in this financial report. The net pension liability was measured as of March 31, 2021 (the latest date in which information is available), and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The Village's proportion of the net pension liability was based on a projection of the Village's long-term share of contributions to the pension plan relative to the projected contributions of all participating members, actuarially determined.

Note 5 - Related Party Transactions

The Department provides the Village with electric service related to public street lighting and other types of lighting. Revenues from this service totaled \$275,457 for the year ended May 31, 2022. Balances due the Department for this service totaled \$12,203 at May 31, 2022 and is included in receivables from operating municipality in this financial report.

Notes to New York Power Authority Financial Report May 31, 2022

Note 5 - Related Party Transactions - Continued

As of May 31, 2022, the Department has a long-term obligation to the Village's Water Fund for cash advances received several years ago. Terms of this long-term obligation require annual payments of principal of \$10,000 plus interest at 1.69%, until the principal balance is fully paid down. This obligation, totaling \$24,234, is included in payables to operating municipality in this financial report. Interest expense incurred and paid on this indebtedness totaled \$1,198 for the year ended May 31, 2022.

In addition, as of May 31, 2022, the Department pre-funded it's June 2, 2022 payroll on May 31, 2022. As a result, a prepaid balance exists between the Department and the General Fund. This receivable totals \$27,170 as of May 31, 2022, and is equal to the accrued payroll at May 31, 2022, which is reported in miscellaneous current liabilities in this financial report.

Note 6 - Other Postemployment Benefits (OPEB)

As discussed in Note 1.i., the Department provides health insurance coverage and survivor benefits for retired employees and their dependents. Attributes of the benefits are as follows:

Contributions

The Department has agreed to contribute a payment of 50% for individual coverage and 35% for family coverage, toward all retirees' hospitalization insurance premium costs for eligible retirees. The Department contributes 100% of the premium payments for individual or family coverage for all employees covered by Article III (4)(b) during the employee's retirement.

Funding Policy

The contribution requirements of plan members are established and may be amended by the Village Board. The Village is not required to fund the plan, other than the pay-as-you-go amount necessary to provide current benefits to retirees. As such, the Village and the Department have not established any cash reserves necessary to provide these future benefits.

Annual OPEB Cost and Net OPEB Obligation

The annual required contribution (ARC) represents a level of funding, that if paid on an ongoing basis, is projected to cover normal costs each year and amortize any unfunded actuarial liabilities (or funding excess) of the plan over a period not to exceed thirty years. Amounts "required" but not actually set aside to pay for these benefits are accumulated with interest as part of the net OPEB obligation, after adjusting for amounts previously "required." The Department's share of the Village's OPEB obligation as of May 31, 2022, as determined by its independent actuary as of May 31, 2022, was \$3,295,276, and has been reported as miscellaneous long-term debt in this financial report.

The actuarial assumptions used to establish retiree contribution rates in the current period include trend rates of annual healthcare costs ranging from 3% to 7.60%.

Notes to New York Power Authority Financial Report May 31, 2022

Note 7 - Commitments and Contingencies

Power Supply Contracts and Transmission Contracts

Electric power distributed by the Department is obtained from the New York Power Authority (NYPA) under a supply contract which expires during 2025. The Department is entitled to a specific amount of kilowatts of firm hydroelectric power and associated energy. Demand, energy, and transmission charges under this contract are subject to change and approval of regulatory authorities. There are no minimum capacity or other fixed charge components to this contract. Electric purchases under this contract totaled \$978,620 for the year ended May 31, 2022.

The Department entered into a contract with the New York State Independent System Operator (NYISO) to purchase TCC's for the period November 1, 2021 through October 31, 2022. Payments made on behalf of these TCC's during fiscal year 2022 totaled \$690,072. As the Department has included these costs in its customer billings (via the PPA) during the year ended May 31, 2022, these costs were required to be expensed as purchased power costs during this period. TCC costs expensed for the year ended May 31, 2022 totaled \$690,072, which was equal to the amounts billed to the Department's customers during this period.

Clean Energy Standards

Effective February 22, 2017, the New York State Public Service Commission (PSC) approved the Phase 1 Implementation Plan associated with PSC Case 15-E-0302, *Proceeding on Motion of the Commission to Implement a Large-Scale Renewable Program and a Clean Energy Standard (CES).* Case 15-E-0302 requires the procurement of Zero-Emissions Credits (ZECs) by all load serving entities (LSE) in New York State.

To comply with the CES, NYPA purchased the required ZECs for the Department (as well as other entities regulated by NYPA). The cost of these ZECs were billed by NYPA to the Department on a monthly basis.

The cost of the ZECs to the Department were \$142,533 for the year ended May 31, 2022. The costs associated with the ZECs have been passed onto the Department's customers, in their entirety, through the CES surcharge applied to each customer's monthly bill. As such, the impact of the ZECs on the Department's statement of revenues and expenses on Page 11, is revenue neutral. Revenues associated with the ZECs are reported as a component of Miscellaneous Electric Revenues (Account 622) on Page 16 of this report.

Note 8 - Risks and Uncertainties

a. Business Risks

The Department is subject to certain business risks that could have a material impact on future operations and financial performance. These risks include prices on the wholesale markets for short-term power transactions; water conditions, weather, and natural disaster disruptions; collective bargaining labor disputes, and governmental regulation.

Notes to New York Power Authority Financial Report May 31, 2022

Note 8 - Risks and Uncertainties - Continued

b. Litigation

The Department is involved in certain suits and claims arising from a variety of sources. It is the opinion of management and counsel that the liabilities that may arise from such actions would not result in losses that would materially affect the financial position of the Department or the results of its operations.

Note 9 - Miscellaneous Items in Surplus

As a result of adopting GASB Statement No. 68 (see Note 1j), the Department reports its proportionate share of the net pension liability, along with related deferred outflows of resources, deferred inflows of resources, and pension expense, as determined by the State and Local Employees' Retirement System. The balance in Surplus as of May 31, 2021 was restated to recognize the net change in the net pension liability and related accounts from May 31, 2020 to May 31, 2021. The May 31, 2021 filing of the NYPA Annual Report was submitted to NYPA before the net change in the net pension liability and related accounts was determined. This net change totaled \$35,961.
